簡介

Hi guys I'm Johnny and come from Tainan, I hold a bachelor's degree with a major in Computer Science & Information Engineering and entered the medical industry when I was during at school. I went all the way from a work-student to a full-time staff. Later, I took over the deputy manager under the strong recommendation and support of the manager. In addition, these experience have provided me with an in-depth knowledge of effective management strategy, marketing planning, and integration technique.

In my current position at Yinghan Technology, the main work content is Human Machine Interface, Design and Development. In this job, I understand the importance of UI/UX Design. Not only image beautiful, but also practical, logical and reliable operability. In this ever-changing technological world, I also understand the importance of learning. I will also take some science and technology newspapers or learn new technologies for reference at rest. I will greatly appreciate the opportunity to speak with you in person in an interview, thank you.
